Summary

Data Analyst and AI/ML Engineer with a strong foundation in Computer Science and Engineering. Experienced in Exploratory Data Analysis (EDA), data visualization, statistical analysis, and building predictive Machine Learning models in Python. Skilled in SQL, Pandas, Scikit-learn, and NLP; able to translate data into actionable insights and communicate findings to stakeholders. Proven leadership in managing technical communities and delivering collaborative projects.

Technical Skills

- **Programming & Querying:** Python, SQL (PostgreSQL, MySQL, MongoDB), Java, C.
- **Data Analysis & Machine Learning:** Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, nltk, spaCy, TensorFlow, Keras, PyTorch, Data Cleaning, Exploratory Data Analysis (EDA), Regression, Classification, KNN, NLP, Feature Engineering, Supervised/Unsupervised Learning.
- **Data Visualization & Dashboards:** Tableau, Power BI, Matplotlib, Seaborn.
- **Statistical Analysis:** Hypothesis Testing, Descriptive & Inferential Statistics, DWDM.
- **Web & Tools:** Flask, Streamlit, Docker, Git, GitHub, Jupyter.

Projects

Machine Learning & Predictive Modeling

- **Car Price Predictor** | [github: @CarPricePredictor](#) | [Live Web App](#) |
Built a regression model in Python and Scikit-learn to predict vehicle market value; performed feature engineering and deployed a Flask web interface for price estimates.
- **Email/SMS Spam Classifier (NLP)** | [github: @SpamClassifier](#) | [Live Web App](#) |
Developed a spam/ham text classifier with preprocessing, tokenization, and TF-IDF vectorization, benchmarking multiple models to reach 97% accuracy; deployed on Streamlit.
- **Movie Recommendation System (CinemaPulse)** | [github: @CinemaPulse](#) | [Live Web App](#) |
Engineered a content-based recommendation engine using NLP and cosine similarity, deployed as an interactive Streamlit app serving personalized film suggestions.
- **Titanic Survival Predictor** | [github: @TitanicSurvival](#) |
Applied data preprocessing, feature engineering, and Logistic Regression to predict passenger survival; evaluated with accuracy and a confusion matrix.
- **NLP Sentiment & Sarcasm Detection** | [github: @SentimentNLP](#) |
Fine-tuned a Transformer model with transfer learning for sentiment and sarcasm classification on real-world text.

Automation & Applied Tools

- **SPSS Friedmann Analysis Automation** | [github: @FriedmannTest](#) |
Automated Friedman non-parametric hypothesis testing with SPSS-style statistical output, streamlining repeated analysis workflows.

Exploratory Data Analysis (EDA) Portfolio

- **Entertainment & Media Analysis** | [github: @NetflixEDA](#) | [github: @SpotifyEDA](#) |
Analyzed Netflix and Spotify datasets to visualize global content consumption patterns, audio feature trends, and cross-platform streaming metrics.
- **IPL Sports Analytics** | [github: @IPLStats](#) |
Analyzed IPL data (2008–2024) to visualize player performance, team statistics, and match-winning factors.

- **Consumer & Financial Behavior** | [github: @EcommerceEDA](#) | [github: @IncomeEDA](#) |
Performed EDA on E-commerce and Adult Income (Census) datasets to identify purchasing drivers and demographic income patterns.

Experience & Leadership

- **Technical Intern, Coremantle** 2025
Automated the Indic code-mix vocabulary pipeline, replacing manual data preparation with a three-step toolchain (`build_vocab`, `merge_vocab`, `build_conflicts`) that extracts script-filtered words with phonetic short codes, merges per-language data incrementally, and generates conflict/alias datasets. Strengthened correctness by aggregating duplicate-word frequencies instead of dropping them, preventing double-counting via SHA-256-based incremental merging, and normalizing conflict keys to match runtime lookups. Expanded configuration and data coverage across hi, te, mr, ta, or, gu, bn, ml, including full rebuild of the Telugu conflict dataset (+100K lines).
- **Community Manager, Srujanee** 1 Year Experience
Built and managed communities to grow engagement, membership, and community development. Strengthened community relations and organizing through consistent member outreach and collaboration with community organizations. Planned and delivered community-driven events and marketing campaigns, gaining hands-on experience in community management, community building, and event management.
- **Campus Ambassador / Coordinator, Entrepreneurship Cell** 2024
Sambalpur University Institute of Information Technology (SUIIT)
Recruited and engaged students for entrepreneurship initiatives; coordinated events and served as the primary liaison between the cell and campus communities.

Education

- B.Tech in Computer Science & Engineering (AIML), Sambalpur University Institute of Information Technology (SUIIT)** 2023 – 2027 (expected)
CGPA: 7.0 / 10.0
- Higher Secondary Education (Class XII), Vedic International School, Sambalpur** 2023
Percentage: 82%
